"Status Report on the Information
Science Center", dated 10 June 1970

1. The Director, Defense Intelligence Agency proposed a plan (reference a) for providing personnel support to the Information Science Center. This item was discussed at the IHC meeting on 7 January 1970 (see paragraph 7 of reference b) and it was suggested that consideration of DIA's request be deferred for a few meetings to provide time for discussions between officials of the Center and individual IHC members. Since that time many discussions on this item have been conducted with some positive results. For example, CIA has furnished two individuals as indicated in reference c.

2. Recently the Director, DIA in his report to USIB (reference d) restated the urgent need for personnel to assist in the development of courses to be offered at the Center. I would, therefore, appreciate your assistance in obtaining personnel from your organization as requested by the Director, DIA in reference a. Details on the individual's qualifications and reporting dates can be worked out between you and the Director, ISC, telephone, OX 3-2625.
